Alta Art Urns

Alta Art urns are hand crafted and hand painted by artisan experts, made from fibre glass and resin using a traditional Vietnamese lacquer art process. As these are hand crafted products, there may be minor variations as this is an attribute of all hand-crafted products.

Compared to the traditional metal urns, these urns come in modern styles, mainly designed by a French designer, which combines the two styles of European sophistication with centuries old Vietnamese craftsmanship.

Cloisonné Urns

Cloisonné is an elaborate process performed in Europe and China for centuries. The shape of the urn is firstly formed out of a metal such as copper and coated with a thin coating of enamel before firing. After firing very fine strands of silver wire bent into shapes are glued to the surface forming a raised pattern. The urn is fired again to fuse the two together. A water-based paste of crushed powdered glass (enamel) is painted into the raised patterns and dried before firing again in an oven to melt it onto the metal. Finally the surface undergoes a polishing process to present an everlasting, and very beautiful appearance. A wooden stand is included.

Keepsakes

Keepsakes range in various sizes and shapes and are supplied with screw caps or backing plates. They are ideal for keeping portions of cremated remains or other mementos such as locks of hair, wedding ring, flower petals or a special message to or from the deceased. It is not uncommon for family members to divide the cremated ashes and distribute a portion among themselves, particularly when there are family members residing overseas. Individual keepsakes are supplied in a small jewellery type pouch unless stated.

Memorial Map

A select range of our Earthurns and Scatter tubes comes with a unique alpha-numeric GeoTag number (see bottom of scatter tube or Earthurn).

This can be used to digitally mark the final resting place of your loved one.

You can use the memorial map to mark the location (within a few feet) of where you loved ones cremated remains/ urn is laid to rest.

You can upload a photograph and create a personal memorial on the memorial map that can be viewed by family and friends. Look out for the GeoTag symbol for the selected range available for this system.

How it works

Choose a selected Earthurns or Scattering tube with the Geotag symbol from the following pages

Locate and keep the GEO-Code

Scatter your loved one's ashes on earth or in the sea, or bury your biodegradable urn, taking note of the location.

Visit www.passagesinternational.com/memoiral-map to create your memorial with the location of the urn or scatted remains.

Share your Geo-Tag memorial page with family and friends so they too can celebrate your loved one's life where they now rest, or online.

NOTE: Colour of images in the catalogue may vary from the actual product.

Earth Urns

Passages Earthurns are manufactured with the environment in mind. The tree bark used to make the paper is harvested from the mulberry tree in such a way that the tree continues to grow, undamaged.

Biodegradable Scattering Urns

Scattering Tube Urns are designed and engineered to simplify the scattering process. The tubes are durable, dignified and simple to use. Each features a convenient removable lid and a perforated "push in" tab that opens easily prior to scattering. They contain no metal or plastic components and can be recycled or composted after use. If multiple family members or loved ones want to participate in scattering, even in multiple locations, portion scattering tubes allow for that option.

Scatter Pods

Fill, seal, scatter: Scatter pods were co designed by a funeral director who wanted a practical easy-to-use scattering tube. These scattering pods, require no glue, no need to turn upside down when placing the ashes in the pod and have no air holes, with the scattering hole close to the edge. This allows a more practical and easy process for funeral directors and those wanting to scatter their loved ones ashes.

Let Your Love Grow

Let Your Love Grow is a proprietary product that when blended with cremated remains, safely and effectively transforms the ashes into life giving nutrients to scatter or bury without any harmful effect on the earth. Let Your Love Grow is available in four kit sizes.

Let Your Love Grow is very rich in organic matter, and when mixed with cremation ashes will transform them so that they can be safely scattered, buried or interred, or used for tree or container planting.

This product is made right here in New Zealand, from natural resources and will unlock the good agricultural nutrients in the bone that has been locked in by the cremation process.

Let Your Love Grow will lower the pH and reduce the toxic level of sodium, and plants and grasses will be nourished rather than harmed.

The environment has been truly considered with this product, as all of the packaging is biodegradable or recyclable.

Let Your Love Grow is for all ashes, be they human or pet, as for many people, their pets are considered to be part of their family and are treasured friends.

Many family members may have ashes at home, in a cupboard or wardrobe, on a dresser or mantelpiece, still trying to decide whether they are going to scatter, inter or purchase an urn. Let Your Love Grow works with these ashes as well as those from recent funerals.

For further information go to www.mortech.co.nz

Fovere Vases

Fovere means "to cherish".

Continue cherishing you loved one whether displaying their favourite flowers or those that are gifted as a sign of care, "I'm thinking about you".

These vases have a fully sealed section to store the ashes in. The internal section of the vases where you can place the flowers is completely removeable and separate from the ash chamber to allow ease of cleaning and changing the water.

Available in Grey and Light blue

Holds up to 220 c.i

NOTE: Colour of images in the catalogue may vary from the actual product.
